5. How to play:

Place Your Bet: You may decide how much you want to bet before the game starts. The higher the bet, the higher the potential winning. Observe the Multiplier. The game starts with a multiplier that increases rapidly. The challenge is to cash out at any possible time you wish before the multiplier "crashes".

Cash Out: You can cash out by clicking the "cash-out button" at any time to secure your winnings. The longer you wait, the higher the multiplier, but if the game crashes before you cash out, your bet will be lost.

Repeat: After each round, You can choose to play again, adjust your bet, and see if you can time your cash-out for bigger rewards.

6. How to win:

The below tips however **DOES NOT** guarantee your winnings but they can give you an edge.

- **Start with Smaller Bets:**

If You're new to the "Hunt", it is advisable to start with smaller bets to familiarize yourself with the game. This reduces your risk while You learn the game's patterns.

- **Set a Target Multiplier:**

You May Settle on a multiplier where You'll consistently cash out. Example: 1.5x or 2x. Sticking to a target can help you avoid the temptation of holding out too long.

- **Use the Auto-Cash Out Feature:**

The "Hunt" allows You to set an auto-cash out at a certain multiplier that you wish. This may help you avoid losing focus and missing your cash-out opportunity.

- **Observe Patterns:**

While the game is random, some players believe in observing trends, like streaks of low or high multipliers, to make more informed decisions on when to cash out.

- **You May Quit While You're Ahead:**

If You have had a few successful rounds, you have a possibility to cash out or consider stopping to lock in your winnings rather than risking them all on another round.

7. The types of bets with their limits:

We have two types of bets: **Single Bet** and **Multiple Bet**.

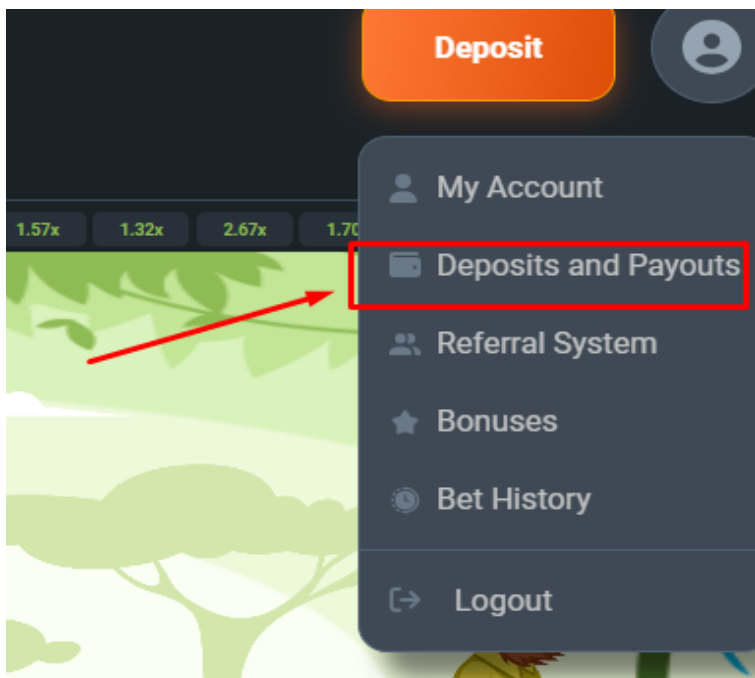

- A **Single Bet** is when You place a wager on one round of the game. You predict when you will cash out before the MZUNGU catches the LION (which means the multiplier stops increasing). If You cash out before the crash, You

win based on the multiplier at that moment. If You don't cash out in time, You lose your bet.

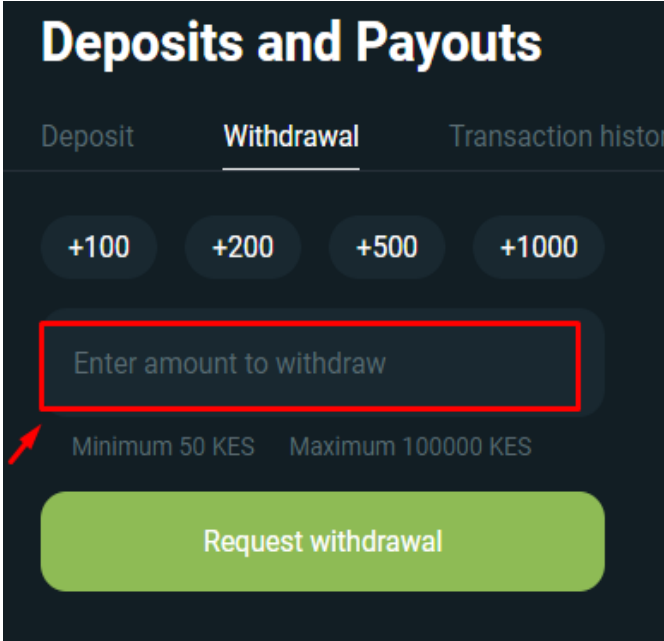

- A **Multiple Bet** game involves placing two or more bets simultaneously within the same round. For Example, You could place one bet to cash out early at a lower multiplier and another bet to cash out later at a higher multiplier. However, if the MZUNGU catches the LION before both cash-outs, you lose both bets.
